COPYRIGHT 2004 DERWENT INFORMATION LTD

TITLE: Database management system includes query optimizer which maintains counter for updates made to data in database and updates statistics automatically, when counter exceeds threshold valueBasic Abstract Text (1):

NOVELTY - A query optimizer (102) selects an executable procedure from several procedures, using the statistic derived from data in a database. The query optimizer maintains a counter for updates made to the data and automatically

updates statistics, when the counter exceeds a threshold value.

Basic Abstract Text (4):

(b) Maintenance method of statistics derived from data.

Basic Abstract Text (6):

ADVANTAGE - Automatically updates database statistics associated with the table to reflect changes in data and removes execution plans generated from the updated statistics. Thus the data in database is maintained easily and more accurately.

Basic Abstract Text (8):

Query optimizer 102

Standard Title Terms (1):

DATABASE MANAGEMENT SYSTEM QUERY OPTIMUM MAINTAIN COUNTER UPDATE MADE DATA DATABASE
UPDATE STATISTICAL AUTOMATIC COUNTER THRESHOLD VALUE
